

Dir-RNN
 σ_{xx} [MPa]

This figure shows the σ_{xx} stress field from a Dir-RNN model. The color scale is identical to the Abaqus plot, ranging from -167.647 MPa (dark blue) to 362.732 MPa (dark red). The stress distribution is very similar to the Abaqus result, showing high stress at the top corners of the side flanges and low stress at the bottom center.

Mean: 0.672
Median: 0.606
Max.: 2.248
Min.: 0.019
