

Dir-RNN
 σ_{xx} [MPa]

This figure shows the σ_{xx} stress field from a Dir-RNN model. The color scale is identical to the Abaqus plot, ranging from -161.354 MPa (dark blue) to 292.459 MPa (dark red). The stress distribution is very similar to the Abaqus result, showing high stress at the notch and low stress at the top.

Mean: 0.701
Median: 0.543
Max.: 3.44
Min.: 0.044
